Experience

Basic Pay

Basic Pay

DA

CCA

TAX

Salary

Experiment 5

Aim to create a webpage for the payroll system.

Tools Required

zoho.com (online application)

procedure:

→ Create a login into zoho.com using their website.

→ Select created tool & click on new solution.

→ Create new application from scratch (payroll system)

→ Enter the web application name now: select a template & design it

→ Run click on the formula sheet which gives the web application result.

→ The values that should be given are TAX, DA, CCA & the Salary.

•  $DA = \text{Basic Pay} \times 0.15$  /  $CCA = BP \times 0.07$   
 $Tax = \text{Basic Pay} \times 0.03$   
now formula  $\Delta$  (Tax) function has been created & used  
for total salary =  $\text{Basic Pay} + DA + CCA - TAX$

→ The values are inserted & result has been outcome after total salary.

Result:-

The webpage to create payroll system has created & executed successfully.
